

9 rubidium has two pdf

Rubidium is a chemical element with symbol Rb and atomic number 37. Rubidium is a soft, silvery-white metallic element of the alkali metal group, with a standard atomic weight of 85.4678. Elemental rubidium is highly reactive, with properties similar to those of other alkali metals, including rapid oxidation in air. On Earth, natural rubidium comprises two isotopes: 72% is the stable isotope ...

Rubidium - Wikipedia

Rubidium-87. Rubidium-87 is an isotope of rubidium. Rubidium-87 was the first and the most popular atom for making Bose-Einstein condensates in dilute atomic gases. Even though rubidium-85 is more abundant, rubidium-87 has a positive scattering length, which means it is mutually repulsive, at low temperatures. This prevents a collapse of all but the smallest condensates.

Isotopes of rubidium - Wikipedia

4 2 Rubidium 87 Physical and Optical Properties to typical laboratory conditions (100 kPa pressure, 20 C temperature, and 50% relative humidity). The index of refraction is calculated from the 1993 revision [13] of the Edlén formula [14]:
