

human factors in flight pdf

Human factors and ergonomics (commonly referred to as human factors) is the application of psychological and physiological principles to the (engineering and) design of products, processes, and systems. The goal of human factors is to reduce human error, increase productivity, and enhance safety and comfort with a specific focus on the interaction between the human and the thing of interest.

Human factors and ergonomics - Wikipedia

Taxonomy. The HFACS taxonomy describes four levels within Reason's model and are described below. Level 1: Unsafe Acts. The Unsafe Acts level is divided into two categories "errors and violations" and these two categories are then divided into subcategories.
