A Turing machine is a mathematical model of computation that defines an abstract machine, which manipulates symbols on a strip of tape according to a table of rules. Despite the model's simplicity, given any computer algorithm, a Turing machine capable of simulating that algorithm's logic can be constructed.. The machine operates on an infinite memory tape divided into discrete cells.

I have seen many people asking for help in data mining forums and on other websites about how to choose a good thesis topic in data mining.. Therefore, in this this post, I will address this question.. The first thing to consider is whether you want to design/improve data mining techniques, apply data mining techniques or do both. Personally, I think that designing or improving data mining ...
