Colby College Gibbs Phase Rule: $f = c - p + 2$ $f =$ Intensive Degrees of freedom = variance Number of intensive variables that can be changed independently without

Gibbs Phase Rule: $f = c - p + 2$

The phase rule is a general principle governing systems in thermodynamic equilibrium. If F is the number of degrees of freedom, C is the number of components and P is the number of phases, then $F = C - P + 2$. It was derived by Josiah Willard Gibbs in his landmark paper titled On the Equilibrium of Heterogeneous Substances, published in parts between 1875 and 1878.

Phase rule - Wikipedia

The document provides the technical background for the Phase I regulation that is issued under authority of the Uniform National Discharge Standards. Along with the complete document, individual sections are listed. You may need a PDF reader to view some of the files on this page. See EPA's About ...

The lever rule is a tool used to determine the mole fraction (x_i) or the mass fraction (w_i) of each phase of a binary equilibrium phase diagram. It can be used to determine the fraction of liquid and solid phases for a given binary composition and temperature that is between the liquidus and solidus line. In an alloy or a mixture with two phases, \hat{L} and \hat{S} , which themselves contain two ...
